Electronic Scanning Radar Systems Esrs Design Handbook

With electronic scanning, the radar beams are positioned almost instantaneously and completely without the inertia, time lags, and vibration of mechanical systems. In an era in which the numerical superiority of adversaries is expected to remain large, electronic scanning can offset that advantage.

Chapter 7 Electronic Scanning and the Phased Array

An active electronically scanned array (AESA), is a type of phased array antenna, that is a computer-controlled array antenna in which the beam of radio waves can be electronically steered to point in different directions without moving the antenna.
